SECURING OUR FUTURE ECONOMIC MOBILITY SUMMIT

Building pathways for upward mobility

Their Success is Our Success

We are excited to announce the 2nd Securing Our Future Economic Mobility Summit. This event aims to inspire community stakeholders to take bold steps towards addressing poverty by establishing a comprehensive, integrated system of social supports that empower families to advance economically.

Palm Beach County has a unique opportunity to enhance economic prospects for families by reinforcing the safety net, lowering barriers to economic participation, leveraging community-based support systems, and promoting equitable support services to facilitate wealth building. Many of our low-income families have faced disproportionate economic challenges, underscoring the urgent need for people-centered and sustainable policies that advance economic security, mobility, and resilience. Consequently, we aim to collaborate with leaders from the private, nonprofit, and public sectors to address local economic conditions by developing policies that “Change the Odds” for the families we serve.

Our 2024 Summit will align efforts to facilitate greater access to health and human service support for families involved with the Securing Our Future Initiative. We recognize that many low-income families face significant barriers that hinder their ability to participate in work or education, ultimately impeding upward economic mobility. This summit will also provide policymakers, institutional leaders, and key stakeholders with actionable strategies to overcome the barriers that often impede low-income individuals from accessing work or education and achieving upward economic mobility. We invite you to share your ideas, actively engage in the sessions, and continue to work with us after this convening.

By partnering with us for this Summit and engaging in this conversation, you will have the opportunity to shape solutions that will foster the workforce of the future. Thank you in advance for supporting this conference and our local economic mobility initiative. Together, we can ensure that every child and family has the opportunity to live in a community where the promise of financial independence becomes a reality.
